- a front-end requisition and catalog system;
- 7 a back-end procurement services system;
- a scanner for scanning images of invoices;
- an image system and store for storing said scanned images and serving them to said workstation keyed to said invoice;

a workstation selectively receiving user entry from said individual employee of a requisition request for goods or services for end-use by said individual employee, receiving confirmation requests, and viewing images of invoices from said image system and store; said confirmation request instructing said individual employee to log on to said back-end system to view and approve an invoice by a specified one of selectively by negative and positive confirmation processing, said negative confirmation processing including advising said individual employee via e-mail that said invoice is confirmed unless specifically not approved by said individual employee, and said positive confirmation processing including advising said individual employee that said invoice will be confirmed upon entry by said individual employee of approval;

said front-end system selectively receiving said requisition requests from said workstation, forwarding said requisition requests to said back-end system, and receiving confirmation requests from said back-end system for forwarding to said workstation; and

said back-end system selectively issuing purchase orders against said requisitions to a vendor selectively as one of an electronic and paper purchase order, receiving and processing invoices electronic invoices directly from said vendor and paper invoices as received and processed by accounts payable personnel other than said individual employee, keying invoice images to invoice information, and processing confirmation requests to said front-end system for communication to said workstation for approval by said individual employee creating said original order for goods or services for end use by said individual employee.

10. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform a method for processing
4 invoices by having the individual employee creating an
5 original order as an end user of a commodity or service
6 determine that a resulting invoice should be paid or not,
7 said method comprising:

preparing an invoice image;

8

25

- 9 storing said invoice image in an image store;
- 10 keying said image to invoice data;
- 11 communicating invoice confirmation request to said 12 individual employee, said request including said
- invoice data and a link to said invoice image;
- responsive to requester selection of said link, 14 displaying said invoice image to said individual 15 employee for approval by said individual employee 16 creating said original order according to a specified 17 confirmation process consisting <u>selectively</u> of one of a 18 a negative confirmation process including advising said 19 individual employee via e-mail that said invoice is 20 confirmed unless specifically not approved by said 21 individual employee, and a positive confirmation 22 23 process including advising said individual employee that said invoice will be confirmed upon entry by said 24
 - 1 11. [Currently amended] A computer program product or

individual employee of approval.

- 2 computer program element for processing invoices by having
- the individual employee creating an original order for goods
- 4 and services for end-use by said individual employee
- 5 determine that a resulting invoice should be paid or not

6	according to steps comprising:
7	receiving at an enterprise accounting and catalog
8	system from said individual employee a requisition for
9	goods or services from a vendor for end use by said
LO	<pre>individual employee;</pre>
L1	said enterprise accounting and catalog system preparing
L2	from said requisition a purchase order;
L3	said enterprise accounting and catalog system
L4	submitting said purchase order selectively as one of an
L5	an EDI message and a paper purchasing document to said
L6	vendor;
L7	receiving from said vendor an invoice for said goods or
18	services as one of <u>selectively as</u> an electronic invoice
19	and a paper invoice, said electronic invoice being
20	received for processing by said enterprise accounting
21	and catalog system and said paper invoice being
22	received for processing to said enterprise accounting
23	and catalog system by accounts payable personnel other
24	than said individual employee;
25	preparing an invoice image of an invoice received for
26	said goods or services ordered by said individual
27	employee;

28

keying said image to invoi	ce data;
----------------------------	----------

said enterprise accounting and catalog system			
communicating by electronic mail communicating an			
invoice confirmation request to said individual			
employee, said request instructing said individual			
employee to log on to said enterprise accounting and			
catalog system, including said invoice data and a link			
to said invoice image, and specifying that said invoice			
is <u>selectively</u> subject to one of <u>to</u> negative			
confirmation and positive confirmation processing, said			
negative confirmation processing including advising			
said individual employee via e-mail that said invoice			
is confirmed unless specifically not approved by said			
individual employee, and said positive confirmation			
processing including advising said individual employee			
that said invoice will be confirmed upon entry by said			
individual employee of approval;			

providing at a user workstation a search interface in said enterprise accounting and catalog system for said individual employee to enter criteria and have links to images of invoices that match said criteria be displayed at said user workstation; and

responsive to selection of a link by said individual employee, displaying said invoice image for approval by said individual employee creating said original order for goods or services for end use by said individual

- 55 <u>employee</u> selectively by said negative confirmation and 56 positive confirmation processing.
 - 1 12. [Previously presented] The program storage device of claim 10, said method further comprising:
 - preparing said invoice images by scanning paper invoices received from a vendor.
 - 1 13. [Previously presented] The program storage device of claim 12, said method further comprising:
 - preparing other of said invoice images by converting electronic invoices received from a vendor into an image file representation having the look of a paper invoice.
 - 1 14. [Previously presented] The program storage device of 2 claim 10, said invoice confirmation request advising said 3 individual employee to process said confirmation as negative 4 confirmation or a positive confirmation.
 - 1 15. [Previously presented] The program storage device of
 - claim 14, said invoice confirmation request further advising
 - 3 said individual employee to log on to a front- end
 - 4 requisition and catalog server to view invoices for
 - 5 confirmation.
 - 1 16. [Previously presented] The program storage device of END920000175US1 11 S/N 09/815,313

- claim 15, said method further comprising responsive to said
- 3 individual employee logging on to said front-end server of
- 4 displaying a list of invoices awaiting confirmation and
- 5 responsive to selection of a selected invoice by said
- 6 individual employee, presenting images of invoices
- 7 corresponding to links selected by said individual employee.
- 1 17. [Previously presented] The program storage device of
- claim 10, said method further comprising presenting to said
- 3 individual employee an interface for selecting images of
- 4 invoices matching a selection criteria.
